

The Burden of Diabetes in AMERICA

Diabetes is a huge problem in the United States.

More than **30 million Americans** have diabetes and face its devastating consequences.

Approximately **9.4%** of the adult population in the United States has diabetes. Of these, an estimated **7.2 million** have diabetes and don't know it, greatly increasing their health risk.

84.1 million people in the United States have prediabetes — a condition in which blood glucose levels are higher than normal but not high enough to be diagnosed with diabetes.

Diabetes is expensive. People with diabetes have medical expenses approximately **2.3 times** higher than those who do not have diabetes.

Every year, an estimated **1.5 million** Americans are diagnosed with diabetes.

Diagnosed diabetes costs an estimated **\$327 billion** each year in the United States.

The Impact of the ADA in AMERICA

The ADA unites the power of **scientists, health care providers, individuals, families, policymakers, corporations, and charitable organizations** across the United States to advance diabetes treatment and prevention, find cures and improve lives.
