

Questions to Ask Your Doctor

- What warning signs should I look for low glucose (hypoglycemia) and high glucose (hyperglycemia)?
- What benefits/side effects should I expect from my medications?
- What can I do to reduce my risk of developing diabetes?
- How can I better manage my symptoms?
- What are some long-term complications of diabetes that I should look out for?
- How often should I be seeing a doctor to optimize diabetes management?
